**DETAILED ACTION**

**Allowable Subject Matter**

1. Claims 1 and 5-9 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claims 1, 8 and 9 are directed to a speech recognition apparatus, method and non-transitory computer readable medium. The Invention discloses using a preliminary word selection method to reduce recognition time and resources needed.

Claims 1, 8 and 9 recite, *inter alia*, following limitations:

selection means, ...., for selecting one or more candidate second words from the plurality of input words not based on the acoustic score, the candidate second words having unstable acoustic characteristic values with a number of phonemes and syllables less than a preset value, wherein the selection means is configured to select said candidate second words likely to be concatenated linguistically to a directly previously recognized word and configured to subject the concatenated candidate first and candidate second words to the matching processing;

Higgins et al. (US Pat. 5,218,668) discloses a system of automatic detection of the occurrence of keywords in an input speech. Higgins discloses concatenating

keywords templates in dynamic time warping algorithms. Higgins fails to disclose above underlined limitations.

Doyle ("Progressive word hypotheses reduction for very large vocabulary continuous speech recognition", Thesis, McGill University, 1997) discloses a large vocabulary speech recognition system. Doyle discloses how to increase recognition rates for commonly used short words. Doyle fails to disclose the above underlined limitations.

Kao (US Pat. 6,374,220) discloses a speech recognition system using two stage search algorithms to increase search speed and using less storage space. Kao uses Viterbi algorithm in word level to prune words and keeps N-best algorithm paths for sentence level. Kao fails to disclose the above underlined limitations.

Prior art of record, either alone or in combination, does not teach or suggest above underlined limitations in combination with other recited limitations, therefore, fails to anticipate or render obvious the claimed invention.

Dependent claims 5-7 are allowed because they depend on claim 1 and further limit claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
